CAREER SUMMARY

Versatile Full Stack Developer with hands-on experience in building scalable web applications using modern JavaScript frameworks, REST APIs, and SQL/NoSQL databases. Passionate about clean code, responsive UI/UX, and continuous learning across the tech stack.

TECHNICAL SKILLS

- Frontend: Html, CSS, JavaScript, TypeScript, React JS, Redux, Next JS
- Backend: Node.js, Express.js, Drizzle, Mongoose
- Database: MongoDB, PostgreSQL
- Api Integration: Restful APIs
- Authentication: JWT, Better-Auth
- Version Control: Git and GitHub

PROFESSIONAL EXPERIENCE

Frontend Developer | IT Himalaya | Kathmandu, Nepal

APR 2023 - MAY 2025

- Built and maintained responsive, high-performance web applications using React.js, Tailwind CSS, ensuring cross-browser compatibility and mobile responsiveness.
- Translated complex UI/UX wireframes into reusable React components, improving code modularity and development speed.
- Managed application state effectively using React Hooks and Redux, enhancing maintainability and user experience across dynamic features.
- Integrated RESTful APIs with Axios, implementing robust asynchronous data handling and error management.
- Collaborated with cross-functional teams and participated in code reviews, following modern front-end best practices and version control with Git and Webpack.

Frontend Developer internship IT Himalaya | Kathmandu, Nepal

FEB 2023 - APR 2023

- Designed and developed responsive, mobile-first web pages using HTML, CSS, JavaScript, and React.js, ensuring consistent user experience across various devices and screen sizes.
- Collaborated closely with UI/UX designers to translate Figma prototypes into interactive interfaces, maintaining pixel-perfect accuracy and usability best practices.
- Integrated RESTful APIs to fetch and display dynamic content, handling asynchronous operations, error states, and loading conditions for smooth user interaction.

PROJECTS

Movie Recommendation System

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

- Developed responsive UI using React.js, ensuring a smooth and intuitive user experience.
- Designed backend APIs for authentication, movie data handling, and recommendations.
- Applied logic to filter out already-rated or watchlist movies, improving recommendation quality.
- Integrated detailed movie data such as genres, runtime, and release dates.

Social Media App

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

- Built interactive features including likes, comments, and real-time updates using React.js.
- Collaborated with backend developers to create RESTful endpoints.
- Prioritized user experience and security through role-based access and encrypted storage.
- Utilized Git for version control throughout development cycles.
